

MORE B.S. IS JUST WHAT WE NEED.

BY 2018, 67% OF ALL JOBS IN WASHINGTON STATE ARE PROJECTED TO REQUIRE WORKERS WITH SOME POST-SECONDARY EDUCATION OR TRAINING.

The demand for graduates with Bachelor of Science degrees will continue to grow — but if state funding is cut by the legislature, our public universities will not be able to meet the critical need of graduating more students with B.S. degrees. Don't sit by and let Olympia continue to gut our higher-education system.

Support higher education this election season by voting for candidates who pledge to ensure our public colleges and universities remain a priority for funding.
