

PROMISE

GOOD HEALTH, REWARDING WORK AND A SAFE PLACE TO LIVE. WITHOUT AN ADEQUATE EDUCATION IN THIS COMPETITIVE WORLD, ALL BECOME INCREASINGLY OUT OF REACH.

Funding our state's public universities is an essential investment for the creation of jobs and the promise of a better future. When our forefathers drafted our state's Constitution in 1889, they promised "ample provision for the education of all children residing within (the state)." That promise is not being met.

Support higher education this election season by voting for candidates who pledge to live up to this promise, ensuring our public colleges and universities remain a priority for funding.
